#Workflow100 – Custom Digital Timesheets with Geo & Auto-Calcs

Scenario

A **Payroll Manager** wants to automate and validate employee time tracking across departments.

Problem

Paper timesheets and spreadsheets lead to delays, inaccuracies, and payroll errors.

Solution

Build a custom digital timesheet with time/date stamps, optional geolocation, and automated hours/overtime calculations. Syncs with payroll for faster processing and reduced admin time.

#Workflow101 – Expense Submission & Approval Tracker

Scenario

A **Finance Director** needs visibility and control over expense claims across the business.

Problem

Receipts are emailed or lost, delays in approval, and compliance gaps.

Solution

Create a mobile expense claim form where employees upload receipts, assign cost codes, and submit for line manager approval. Digital trail ensures faster processing and compliance.

#Workflow102 – CapEx Request & Approval Workflow

Scenario

A **Commercial Finance Manager** wants to formalise the approval of capital expenditure.

Problem

CapEx requests come via email with inconsistent detail and no standard review process.

Solution

Build a CapEx submission form with project rationale, estimated costs, ROI notes, and approval stages. Workflow routes requests to the appropriate stakeholders based on spend thresholds.

#Workflow103 – Month-End Checklist Tracker

Scenario

A **Financial Controller** needs better oversight of month-end close activities across finance teams.

Problem

Task completion is tracked via email or spreadsheets—making deadlines hard to manage and issues easy to miss.

Solution

Create a structured month-end checklist, assigned by user or department, with due dates, status tracking, and automated alerts for overdue items.

#Workflow105 – Budget Reforecast Submission Form

Scenario

A **Finance Director** wants to collect reforecast data from department heads quarterly.

Problem

Submissions are delayed, inconsistent, and require follow-ups—slowing down financial planning.

Solution

Build a standardised reforecast form per department, capturing variances, rationale, and updated budget figures. Export clean, structured data for consolidated reporting.

#5ReasonsWhy

5 reasons why IT leaders should choose **WorkMobile** to implement and manage digital workflows across the business

1. IT Stays in Control—Without Becoming a Bottleneck

WorkMobile empowers IT to oversee system governance, data security, and integration—while giving departments the freedom to build and manage their own workflows. IT can approve templates, set rules, and manage user access—without fielding every workflow request.

2. Rapid Deployment Without Custom Coding

Launch cross-departmental solutions in hours—not weeks. WorkMobile’s no-code platform allows IT teams to deliver tactical apps, forms, and reporting tools quickly, without needing to pull developers off core projects. Perfect for addressing urgent business needs fast.

3. Extendable with Pro-Code When Needed

Unlike basic form builders, WorkMobile is designed to scale. IT teams can integrate with existing systems (ERP, HR, CRM, Asset Management), use webhooks or APIs, and customise workflows with advanced logic—bridging no-code speed with enterprise-grade flexibility.

4. Built-In Compliance & Data Governance

Data is encrypted, audit-ready, and stored securely in the cloud. IT teams can enforce compliance policies across departments—ensuring workflows meet GDPR, ISO, or sector-specific standards with full version control, traceability, and approval tracking.

5. Consolidate Tools and Reduce Shadow IT

WorkMobile helps IT standardise the way forms, reports, and mobile data collection are built across the business—reducing the need for rogue spreadsheets, siloed apps, or unapproved tools. One platform. Multiple use cases. Total control.

About Workmobile

Many IT departments will be aware of the challenges involved in developing workflow solutions across departments. Capex, finding the right skillsets, time constraints in deploying and not to mention how to support multiple devices over the long term.

The solution? WorkMobile is an award-winning toolkit that allows you to quickly build solutions enabling staff to capture all essential data.

Available to use on every type of mobile device, it provides IT Managers, with a faster, cheaper and more efficient way to develop streamlined workflow solutions. Stored securely in the cloud, information can be easily accessed and shared. When necessary, businesses can develop a clear electronic audit trail to keep their customers fully informed.

Does it work? Well, since WorkMobile's inception, we have processed over 30 million records. We currently work with over 250 customers who are all benefiting from time and money savings, with the assurance that they are operating in the most compliant manner.

Our aim? To keep providing innovative solutions to our expanding customer base. We would love to help you improve your business processes and give you a competitive advantage.
